

Amendments to the Specification:

Please replace paragraph **[0013]** with the following amended paragraph:

[0013] Applicant claims priority to provisional application Ser. No. 60/215,681, filed Jun. 30, 2000, which is incorporated by reference herein.

Please replace paragraph **[0029]** with the following amended paragraph:

[0029] As shown in FIG. 1, it is possible for several people to watch programming on video display 105 while one or more other persons uses computing device 150 to view an EPG on display screen 158. People viewing EPG programming information on the computing device 150 can make selections and may even view local previews on the display screen 158. As a result, the programming displayed on video display 105 is undisturbed, and those perusing an EPG using computing device 150 can do so at their leisure. Also, because the EPG is shown on computing device 150, it is more easily customized and can be seen more clearly.

Please replace paragraph **[0040]** with the following amended paragraph:

[0040] Alternatively, the logic to perform the system and method described herein may be implemented in additional computer and/or machine-readable media such as discrete hardware components as large-scale integrated circuits (LSI's), application specific integrated circuits (ASIC's), and firmware such as electrically erasable programmable read-only memory (EEPROM's), and electrical, optical, acoustical, and other forms of propagated signals (e.g., carrier waves, infrared signals, digital signals, etc.).
